

SEE BETTER

WITH ANTI-REFLECTIVE LENSES

TRADITIONAL LENSES

ANTI-REFLECTIVE LENSES

THE CLEAR BENEFITS OF ANTI-REFLECTIVE LENSES

Distracting reflections and glare can rob your eyes of up to 14% of available light. Anti-Reflective lenses allow virtually all the available light to pass through your lenses for sharper, clearer, more comfortable vision. Recent tests prove that patients are able to see more clearly with Anti-Reflective lenses, especially at night.

REDUCE EYE STRAIN

Spending long hours at a computer screen, whether at work or play, can dramatically contribute to eye fatigue. Anti-Reflective lenses eliminate the glare and discomfort this activity often causes.

LENSES

LET PEOPLE SEE LESS LENS AND MORE OF YOU

Now you can eliminate annoying reflections on the surface of your lenses. Anti-Reflective lenses allow you to see better and look better, while enhancing your ability to communicate with others.

The new generation of Anti-Reflection lenses are easier to clean than ever before.
